📁 PROJECTS

Goskillready ↗
present
Creating a Learning Management System (LMS) web portal consists of more than 500+ Certified Trainers and online education. In this project, we are developing a web application for managing the educational part for the students. For front-end am using Nextjs and for back end am using Django

    Job Responsibilities:
    - Worked on front-end and Back-end in the development phase.
    - API-integration

    Technical Overview:
    - Nextjs, Django, CSS

Django Project's
I have successfully completed four Django projects, all of which revolve around registration-based webpages. These web pages not only facilitate user registration but also enable users to send valuable feedback messages to the site owner.

    Job Responsibilities:
    - I have done all these projects as a full-stack developer
    - API-Integrations
    Technical Overview: Django, Html5, Css
